Skills

Java : Good
Javascript : Good
Typescript: Good
C#: Good
C++: Good
Python: Intermediate
Elixir: Intermediate

Languages

Dutch : Mother tongue
English : Fluent
French: Intermediate

Goals

I would like to complete my education in Game Development successfully and find a job where I can develop the next generation of computer games using the skills I have learnt at Howest during my bachelor's degree in Game Development.

Education

September 2014 – June 2020
Heilig Hart College Tervuren
I graduated in 2020 earning a high school degree in science and mathematics.

September 2020 – June 2023
UCLL • 1st bachelor – Applied Computer Science
I have completed my bachelors degree in Applied Computer Science. During this degree I learned how to make the front-end and back-end of websites, how to use databases and some of the basics of how networks work.
In my third year I worked on a project for the Materialenbank Leuven. For this project, in a team, we made a mobile application for recycling of building materials. This application was nominated for the Moving Minds Award of the UCLL and for an FTI award from the Flemish government.

September 2022 – December 2022
Cardiff Metropolitan University • Game development
In my third year at UCLL I studied a semester abroad in Cardiff where I gained my first experience in developing games.

September 2023 – Now
Digital Arts and Entertainment • 2nd bachelor - Game Development
I am currently in my second year of Game Development at DAE and I will be transferring to the University of Wisconsin-Stout for a semester to get a flavour of the design aspect of gaming.

Work experience

August 2019
Agape – Scholengroep Brussel • Kitchen
Student: Help in kitchen for packing and unpacking food and supporting the production line (e.g. cooking meat)

July 2020 – August 2020
Ganspoel • Cleaning aid
Student: Cleaning the rooms of the residents and helping with the washing of their clothes. Additionally I supported the staff in creating an Excel file with an overview of all the purchasing.

February 2023, August 2023, July 2024
ING • Administrative aid
Student: Fulfill multiple data quality improvement needs in our CRM systems.

August 2019
Agape – Scholengroep Brussel • Kitchen
Student: Help in kitchen for packing and unpacking food and supporting the production line (e.g. cooking meat)
